FAKTA

Ifølge Verdensbanken er antallet af mennesker, som lever i ekstrem fattigdom faldet fra cirka 2,2 milliarder til cirka 800 millioner siden 1990.

Den forventede globale levealder er steget fra 65 år til 74 år, og børnedødeligheden er faldet med næsten 60 procent.

FAKTA

Udviklingsbistand kan ikke alene skabe udvikling – den drivende kraft er landene selv. Men udviklingssamarbejdet har været en central årsag til disse fremskridt.

FAKTA

Udviklingsbistanden bidrager også til Europas og Danmarks økonomi og konkurrenceevne.

F.eks. forventes den økonomiske eksport afledt af EU's udviklingsbistand at overstige selve bistanden.
